
Neil Buckholz, Enchi Liu

Private Partners Scientific Board (PPSB)

And Site PIs, Study Coordinators and over 1000 subjects enrolled in 58 Sites in US and Canada
MOST IMPORTANT

• Recruitment of AD subjects and L MCI subjects is going quite slow
  – Please please enroll 2 AD and 2 LMCI subjects at your site in the next few months!
New Subject Group

• Starting the in fall we will be enrolling a new group of subjects
  – Controls with memory complaints
• Paul Aisen/Ron Petersen will explain this more later today
• Please focus all your ADNI energy into AD and L MCI enrollment now!
CONGRATULATIONS

• To Cliff Jack for winning
  – The Metropolitan Life Award
  – The Gold Medal of the International Society for Magnetic Resonance and Medicine

• To Takeshi Iwatsubo for winning
  – The Potemkin Award
Problems in ADNI

- ADNI is a very complicated study
  - Has many clinical and biomarker elements
  - Has evolved from ADNI1, to ADNI GO, to ADNI 2 continuously
    - Without stopping any one study and “locking”
  - ADNI is open to “all”
  - ADNI has been an “experiment in progress”
- These complications have led to some problems
Problems (continued)

- All the ADNI Cores have done their job extremely well
- Due to failures in overall communication, coordination and integration, there have been some problems
- No serious harm has been done
- These problems are now recognized, are being fixed, and an overall plan for better integration is being implemented
ADNI IS A MODEL

• Increasingly, ADNI is hailed as a model
  – For being a successful public private partnership
  – For openly sharing its data
  – For fostering international projects
  – For the collaborative spirit and good will within the ADNI family

• We should all take pride in working together on this project, which clearly is impacting the AD field
ADNI IS FUNDED BY NIA
